Conlanging and Linguistics

Linguistics: the scientific study of language

But what is language?

- “A language is a system of arbitrary vocal symbols by means of which a social group cooperates.”
–Bernard Bloch & George Trager 
- Thoughts → words → sounds/gestures → communication

What is a conlang?

- An artificially created language

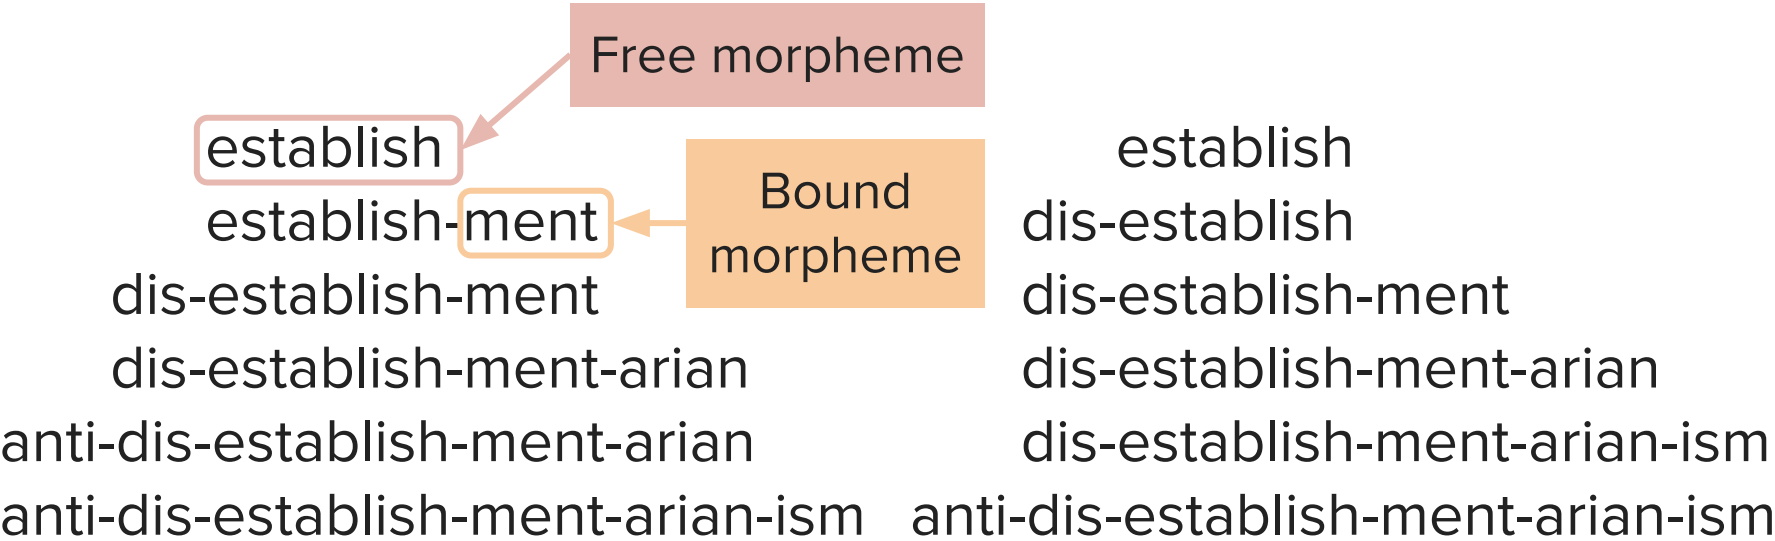

- Auxlangs
 - Volapük, Esperanto, Ido, Interlingua
- Engelangs
 - Lojban, Toki Pona
- Artlangs
 - Sindarin, Quenya, Newspeak, Dothraki, Klingon

Morphology: the Structure of Words

Derivational morphology

antidisestablishmentarianism

How do we separate morphemes?

- Chalkboard = chalk-board
- Untranslatable = un-translat-able
- Quickening = quick-en-ing
- Helicopter = heli-copter (originally helico-pter)

Some languages take it to the extreme

Grammar: the Structure of Phrases

Word order

- Constituent order: placement of subject, verb, and object
 - SVO: She loves him English, Swahili, Chinese languages
 - SOV: She him loves Japanese, Hindi (most common)
 - VSO: Loves she him Classical Arabic, Hawaiian
 - VOS: Loves him she Malagasy
 - OVS: Him loves she Hixkaryana
 - OSV: Him she loves Warao
- Separating V and O is grammatically unfavored
- V2 word order: verb comes second
 - “I go often” → “Often go I” (*not* “Often I go”)

Word Orders of World Languages

Changing word order

- Many languages use subject-verb inversion to mark a yes-no question
 - Du **bist** da. → **Bist** du da?
You **are** here. → **Are** you here?
- English is unusual because it relies on do-support
 - Du **besitzt** ein **Auto**. → **Besitzt** du ein **Auto**?
You **own** a **car**. → **Do** you own a **car**?

vowels

Vowels at right & left of bullets are rounded & unrounded.

Tones

- Affect the meaning of words in tonal languages
- Varying degrees of complexity, from low/high to tone “shapes”
- Some languages use pitch accents: series of pitches within a word, rather than inside a syllable

Phonotactics

- Rules for acceptable sound combinations in syllables
- Also specifies what sounds are allowed in each position

Language Evolution

Language families

- Sets of languages can be traced to a common ancestor through comparative linguistics
- Examples:
Indo-European,
Afro-Asiatic, Sino-Tibetan

Sound changes

- Great Vowel Shift in English
 - 1400-1700
- Lenition: softens consonants
 - Grimm's Law
 - Latin **pater** vs. English **father**
- Metathesis: flipping of two sounds
 - Latin **miraculum → Spanish **milagro****
 - Middle English **brid → English **bird****

Writing Systems

Orthography

- Relationship between graphemes and phonemes
- Can become deeper over time due to sound changes not reflected by spelling
 - Thai hasn't had a spelling reform since 1283

Alphabets

- Glyphs are letters, representing both vowels and consonants (sometimes combinations)
- Often (not always!) contain lowercase (minuscule) descended from uppercase (majuscule)
- Examples: Latin, Greek, Cyrillic

Abugidas/Alphasyllabaries

- Glyphs are consonant-vowel sequences
- Unlike abjads, vowels are normally written, but as secondary parts of glyphs
- Work well with languages that use CV phonotactics
- Examples: Devanagari, Gujarati, Khmer, Thai, Ge'ez

Syllabaries

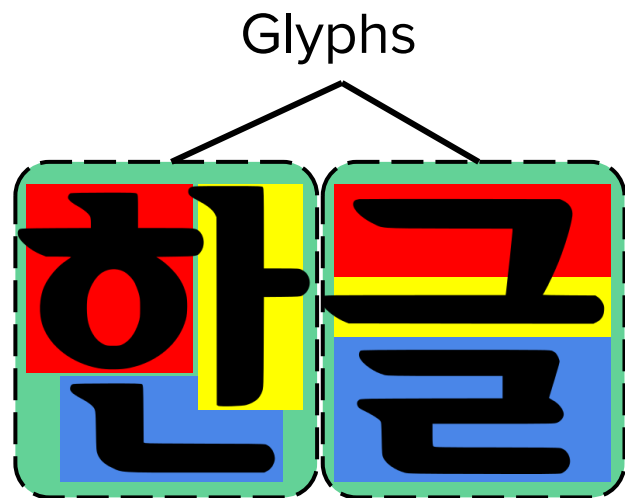

- Glyphs represent unique syllables
- Works well with languages that use CV phonotactics
- Examples: hiragana, katakana, Cherokee, Linear B

Alphabetic Syllabary

- Consonants and vowels all have graphemes which are arranged into larger syllable-sized glyphs
- Example: Hangeul (Korean)
 - Featural script: grapheme shapes are informative, not arbitrary
 - Designed by King Sejong in 1443

Logographic Systems

- Glyphs are characters, sometimes composed of smaller graphemes like radicals
- Glyphs do not directly indicate pronunciation, must be learned by speakers
- Examples: Hieroglyphics, cuneiform, Chinese characters

My recommendations for conlanging

Do

- Study other languages to gain insight
 - Think about what you like and dislike from them
- Learn about grammar
- *Suggestion*: build a world for your languages to live in

Do not

- Make a relex
- Make a “kitchen-sink” conlang
- Limit yourself based on what is familiar from your native languages
